

WARNING!

What To Do If You Smell Gas

- Do not light match near source.
- Wait 2 minutes.
- If smell persists, remove rear cover to check for leakage.
- If leakage has occurred, discard rear cover along with any debris.
- Clean exhaust area thoroughly and attach new rear cover.

Those directions are not for a gas stove or a new automobile. They're from **Baby: An Owner's Manual**, *Operating instructions no baby should be delivered without*.

This baby care handbook looks and reads like an appliance manual, combining how-to instruction with the comic relief new parents need to cope with their latest acquisition.

Through hilarious photos, illustrations, safety precautions and warning symbols, parents will learn proper care and maintenance of their unit. Sections include setting Baby's clock, handling and filling, cleaning and lubricating, and troubleshooting.

Destined to be a hit at the baby shower, this pitch-perfect parody is also the ideal gift for first-time fathers. They'll no longer have to ask, "Do these things come with instructions?"

A percentage of the authors' proceeds will be donated to organizations and charities that promote infant health.
